CEB's SHL-style Verbal Reasoning Graduate/MGMT Question Preview

Companies wishing to increase their growth rate occasionally employed the method of franchising, which provides a new owner with a permit to use their business identity and to whom they purchase products exclusively from the company. However, today most companies aim to minimise use of this method and often prefer expansion of the company's own branches. Companies that have previously used franchising have learnt the necessity of monitoring the business operation of the franchised branch. Inadequate attention to the monitoring of franchisees on the part of the company was typically a cause of serious problems. Difficulties arose from franchisees and companies disagreeing on business policies such as customer care, service delivery efficiency and quality of human interaction.

3. Which one of the following reflects a problem related to lack of monitoring?

- Deterioration in the quality of products [X]
- Poor customer service [X]
- Supply exceeding demand [X]
- Lack of delivery services [X]

Cubiks-style Numerical Graduate/MGMT

Numerical Reasoning - Advanced #5

The Cubiks Numerical Reasoning test for graduates and managers measures an individual's ability to analyse and interpret numerical data using basic arithmetic and computational skills. The items are presented in different forms, such as graphs, diagrams and tables.

- Test content and themes are usually related to the job description.
- Each question has only one correct answer.
- Please make sure you have a calculator, a pen and some paper.
- Work as quickly and as accurately as you can.
- The test consists of 24 questions

GOOD LUCK!!
